

INSTITUTIONAL IMPROVEMENT SUGGESTIONS
FALL 2007

FACULTY / STAFF RECOMMENDATIONS

On the Ash Flat campus there is a smoke receptacle at the door at the end of the hall. But apparently no one is using it much, because there are 100's of cigarette butts on the ground that really is tacky. I think the thing needs to be disposed of and stricter surveillance of the smokers who congregate out there.

As much as I dislike the smoking habit, I think they need a covered place to smoke at AF and MV. Something like is at Melbourne.

The drama club bought a bunch of pictures that we had on the walls in the main building, but we don't have any frames. Could your committee come up with any money for frames? :)
Thanks!

New mats outside the Miller Building doors would be great--not sure that's an institutional improvement issue, but they are really old and falling apart. With the weather we've been having lately it's become evident that they won't last much longer. Thanks so much.
