OZARKA COLLEGE BUSINESS TECHNOLOGY DIVISION ASSESSMENT GOALS SMALL BUSINESS MANAGEMENT	COURSE ASSESSMENT PRIOR TO REGISTRATION	COURSE ASSESSMENT WITHIN SEMESTER How this course meets the Assessment Goals and How assessment is done.	END OF PROGRAM ASSESSMENT
Ozarka College's mission is to provide its students and citizens with quality comprehensive higher education, technical education, adult education, continuing education, workplace education and cultural opportunities.		This course emphasizes entrepreneurship as it relates to small business management. Topics include the nature of small businesses, starting a small business, and successfully operating a small business.	
Ozarka College's objective is to encourage development of academic, technical, economic, social, cultural, and global awareness skills that lead to a positive, productive and fulfilling life in an ever-changing world.	Course Pre-Requisites Measurable course objectives	Exams, classroom discussion of real world small business activities. Completion of a Business simulation project including business plan and other items associated with a start-up small business.	
Associate of Applied Science, students will gain the broad range of knowledge, skills, and attitudes necessary for successful entry into the workforce.		Entrepreneurship is equated to risk-taking. Entrepreneurs recognize a potentially profitable opportunity, and take it. However, most consultants agree that the reason so many small businesses fail is poor management. This course is designed to provide the managerial focus and the resources to help eliminate some of this entrepreneurial risk.	
Through the Certificates of proficiency students will gain specialized knowledge, skills, and attitudes required for entry level positions in their fields.		This course teaches specialized knowledge in developing a valid business plan for the traditional start-up of a small business.	
Adult learners at local businesses and industries will be able to upgrade job skills by accessing customized training activities which promote workforce readiness and on-the-job success.		Students in local businesses and industries may upgrade job skills with this course. Course is offered online as well as in the classroom.	
Low teacher-to-student ratio will promote comprehensive learning and understanding.		Course limited to 73 IV classroom students	
Academic, vocational, and personal guidance and counseling		Instructor is available for student counseling and advising.	
Assessment and evaluation to ensure that programs and services grow and change with the needs of the service area.		Service area is monitored to ensure that course meets the needs as they change. Business Advisory Committee Meeting.	
Relevant training		Training in this course is very relevant to the needs of today's business world.	
Development of abilities needed to be successful in life.		Be able to define an entrepreneurial opportunity. Understand the role of a Business Plan in a small business. Obtain the skills and knowledge to develop a Marketing Plan. Define the strategies necessary in small business marketing. Identify the issues involved in managing small business operations.
