Instructors and Adjuncts Responded with the following:

They have had most success with:

- Asking leading questions, which motivates student thinking and building student confidence.
- Group Activities that integrate book material in real world applications.
- Hands on computer usage with projects such as web searches, e-mail, word processings, etc.
- Team Projects and Team Skill Building.
- Making the students feel comfortable with asking questions and participating in discussions.
- WebCt enhancement.
- Using power point to teach lecture classes.
- One-on-one interaction.

Most difficulty with:

- Attendance.
- Control of satellite campuses.
- Building momentum in a class that meets only once a week.
- Problems with computers in AF computer lab.
- Determining each student’s individual learning style.
- Finding the best way to each new concept to each student.
- Lack of confidence among students.
- Student personal problems and how to deal with absenteeism.

I find the text, instructional material, syllabi, learning outcomes, etc. to be:

The master syllabi works effectively. This method presents a professional and organized appearance to the students.
Good books.
Excellent Tool.
Need to rework the Pre-assessment tool for Introduction to Computers.
Excellent text and materials and terrific support from main campus.
Need access to copier at night.
Practice Sets, Simulations, and creating works best.
Very up to date.
Will not use the Computer Systems book in the future. Need to select a vendor and prepare appropriately.

Things to help support efforts to satisfy students and stakeholders:

- It was suggested to make Algebra and English a prerequisite for Accounting 1 or make Introduction to Accounting a prerequisite for Accounting 1.
- Enlarge Bookstore Area.
- Allow for Book Purchase prior to class start dates.
• Distribute student advisee duties evenly amongst faculty.
• Computer Lab needs better hardware maintenance procedures.
• Ash Flat office needs to be open during evening classes.
• Perhaps more pre-semester publicity (including class schedules)
• Computer lab class size should be slightly less than number of computers in lab (in case some units are down), plus need for individual attention.
• Computer (e-mail) message board for faculty and adjuncts.
• More night courses.
• Saturday Classes.
• Lights in the AF student parking lot.

Ozarka College could help them do a better job if:
• I had a file cabinet at Mountain View.
• Knowing how firm I can stand.
• Change the Economics Book.

Comments about Sonis:
• Outstanding: a very effective tool in managing my classes.
• Better Instructions/training for adjunct faculty.
• New system will be great.
• Sounds like it is getting more user friendly.
• Effective but slow.
• I use the rosters and advisee info extensively.
• No problems.

Comments about Division Chairs:
• Love it.
• I feel that this has helped me to do my job and focus where I need to focus.
• She does a good job.
• Helpful.
• Good contact.
• Very helpful
• Fine.
• Doing a great job.
• She is doing great.
• Always willing and available for assistance or guidance.

Additional comments:
• Loved the new name game.
• Ozarka is an excellent opportunity.
• It’s great to be a part of Ozarka and to have the opportunity to serve.
